International Academy of Medical Aestheticians

The International Academy of Medical Aestheticians is a new extension of the KT Group of Companies that includes KT Training; a Global Leader in Medical Aesthetic Training.

Yasmin Khan, the co-owner of the KT Group of Companies, is a former Aesthetician, Author of 'Simple Steps to Building Successful Cosmetic Practices' and the former International Sales Director of Inamed and Collagen Corp (US). Yasmin Khan pioneered medical aesthetic training for Nurses in the United States and United Kingdom and now sees an opportunity for Aestheticians to enter this new and exciting industry. With the IAMA accreditation, Aestheticians can run their own medical businesses and integrate with senior Medical Professionals to provide superior medical cosmetic treatments to the public.

How will I benefit from the IAMA Program?

IAMA is a Post-Graduate Group of Courses designed to teach candidates with Beauty Therapy NVQ Level 3, BTEC and CIDESCO or equivalent; Medical Aesthetic Treatments.

The selection of courses are elective and Beauty Therapists can choose to take either individual courses or a series of courses which will enable them to work towards a Medical Aesthetician Qualification. The training courses are intense, so we have developed free, online training modules to prepare attendees prior to attending a course.

The technical and practical training on the Skin Management and Skin Health Courses will allow Beauty Therapists to identify common skin problems and design skin solutions superior to what is presently offered within both the Beauty and Medical Aesthetic Market.

The range of courses open up new opportunities for post qualified graduates. Upon completion of the IAMA Courses, Beauty Therapists can work cohesively with Medical Professionals or choose to operate a non-surgical clinic profitably for the long term. Beauty Therapists will enhance their career, differentiating themselves from other therapists who have only trained in various work places. The technical and business training will dramatically increase a person's compensation.

What does IAMA training involve?

The IAMA was developed to provide an approved, post-graduate, advanced medical aesthetics training to Beauty Therapists in a clinical and regulated setting.

The online elective training consists of 19 modules dedicated to Cosmetic Dermatology. They will provide essential in-depth advanced training on the science of the skin. This training will assist Beauty Therapists in improving the skin with home care products, Chemical Peels and Derma Roller treatments. More information on the online training can be found on www.iama.org.uk

Post Graduate Foundation Courses

■ Laser Hair, Vein, Lesion and Skin Tightening Training

■ Medical Grade Chemical Peel Training

■ Derma Roller Training

Post Graduate Master Courses

■ Skin Health and Skin Management Training

■ Cosmetic Dermatology Training

Post Graduate Specialist Courses

■ Customer Service Training

■ Business Management Training

Skin Management and Skin Health

What does the course involve?

On the practical training day, you will review the science of the skin in detail and how environmental and internal factors such as hormones, nutrition and immune deficiencies can compromise skin health. We will discuss the current scientific methods of categorizing skin types combined with the etiology and treatment of the different skin types. Included in this course is a technical discussion of some of the major skin problems and recommended treatments. Please visit www.iama.org.uk for more information on this course.

Cosmetic Dermatology

What does the course involve?

In this module, we are focusing on the difference between cosmeceuticals and cosmetic products. We will hone in on key skin ingredients which any skin expert should become familiar with if they wish to improve skin problems with topical products. The knowledge gained from this course combined with the other practical courses will provide you with the skills to become a skin management specialist. This course is designed to train Aestheticians to identify skin problems, know the etiology of the problem, create treatment programs consisting of clinic procedures and take home skin health programs. This is a unique course not available to medical professionals as yet. Please visit www.iama.org.uk for more information on this course.

Derma Roller

What does the course involve?

Derma Roller is a medical and beauty treatment that compliments or can replace certain treatment modalities in the non-surgical arena. In this course we will be discussing the advantages of using the derma roller over chemical peels, microdermabrasion, and laser therapy. We will also discuss how derma roller therapy can be combined with cosmeceuticals to treat many skin problems and to improve skin health for mature and young patients. This treatment is also much more cost-effective than other alternative therapies making it affordable for the mainstream public to improve their appearance at an affordable price. If you own your own clinic, the skills gained from this entire course will dramatically improve your bottom line.

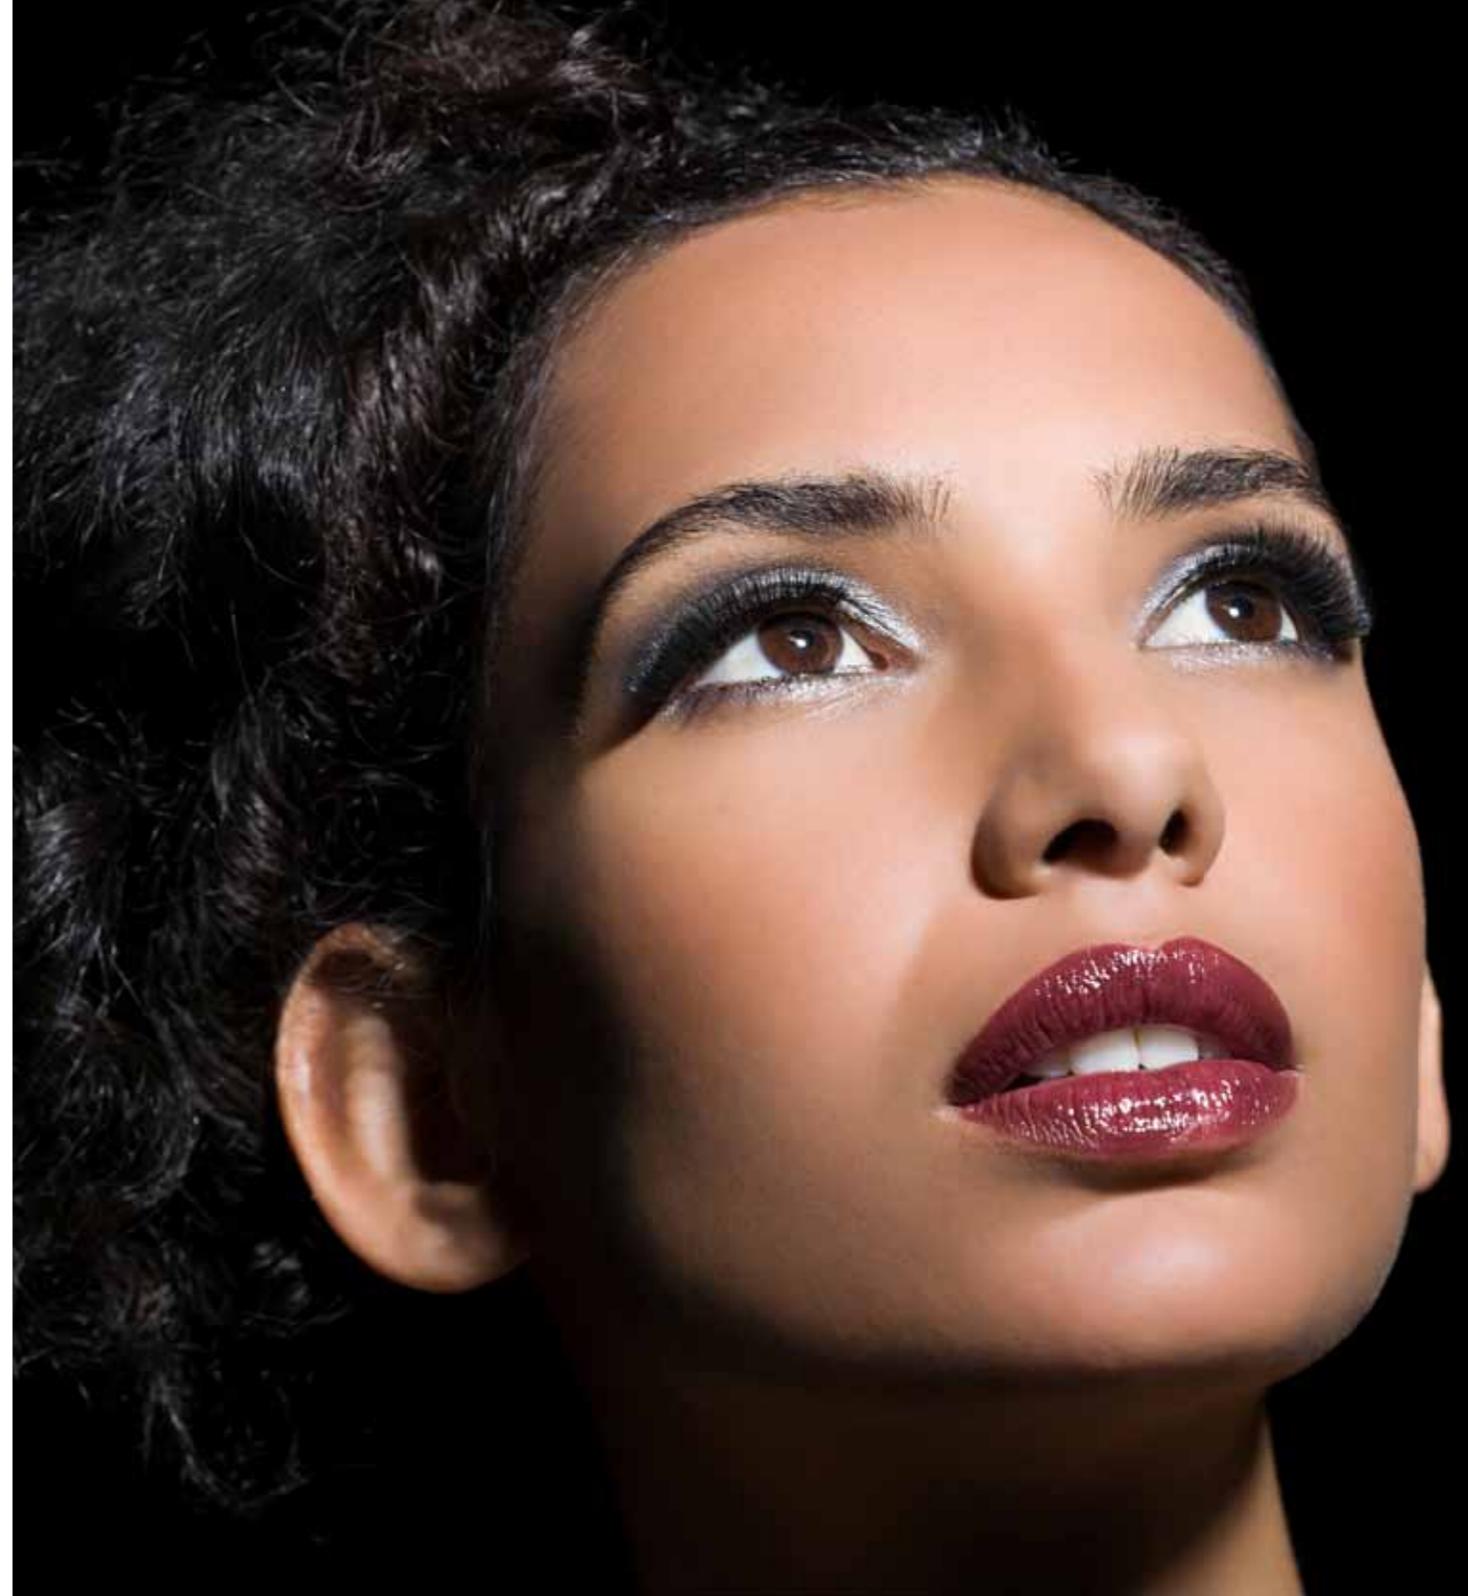

Chemical Peels

What does the course involve?

The objective of this course is to train course attendees on the basic technique of improving the skin using Medical Grade Chemical Peels.

Medical Grade Chemical Peels are formulated differently to beauty peels; the PH of the most popular medical peels range between ph1.6 and ph0.7 making the peels much more potent than the very light superficial peels. Upon completion, Aestheticians will become confident in diagnosing skin problems, developing skin programs, and treating a range of skin conditions, including hyper pigmentation, acne skin, dry skin, oily skin and mature skin with peels and skin care. This course is invaluable to Aestheticians whose aim is to help their clients maintain healthy skin for life.

Laser and IPL Treatments for Hair, Veins, Lesions and Skin Tightening

What does the course involve?

This two day intensive Laser Training Course will focus on both theory (Day One) and intensive practical training (Day Two). The course will be facilitated by leaders in the Laser Industry. The online training will give course attendees a head start and the instructor will take therapists from theory to practical excellence. Candidates will learn how to use Lasers and IPL to treat a number of cosmetic problems including Excessive Hair, Lesions, Body and Facial Veins and Ageing Skin.

Customer Service Training and Consultation Skills

What does the course involve?

The objective of this course is to train Medical Aestheticians on the protocol of good customer service by focusing on key areas which will enhance their credibility and business success.

Candidates will be learning how to improve their interpersonal communication and listening skills, resulting in improved client and clinician communication. Improved customer service in a business relationship always leads to increased client retention resulting in increased revenue and referrals. Completing this course will increase job security, income and respect from peers and employers.

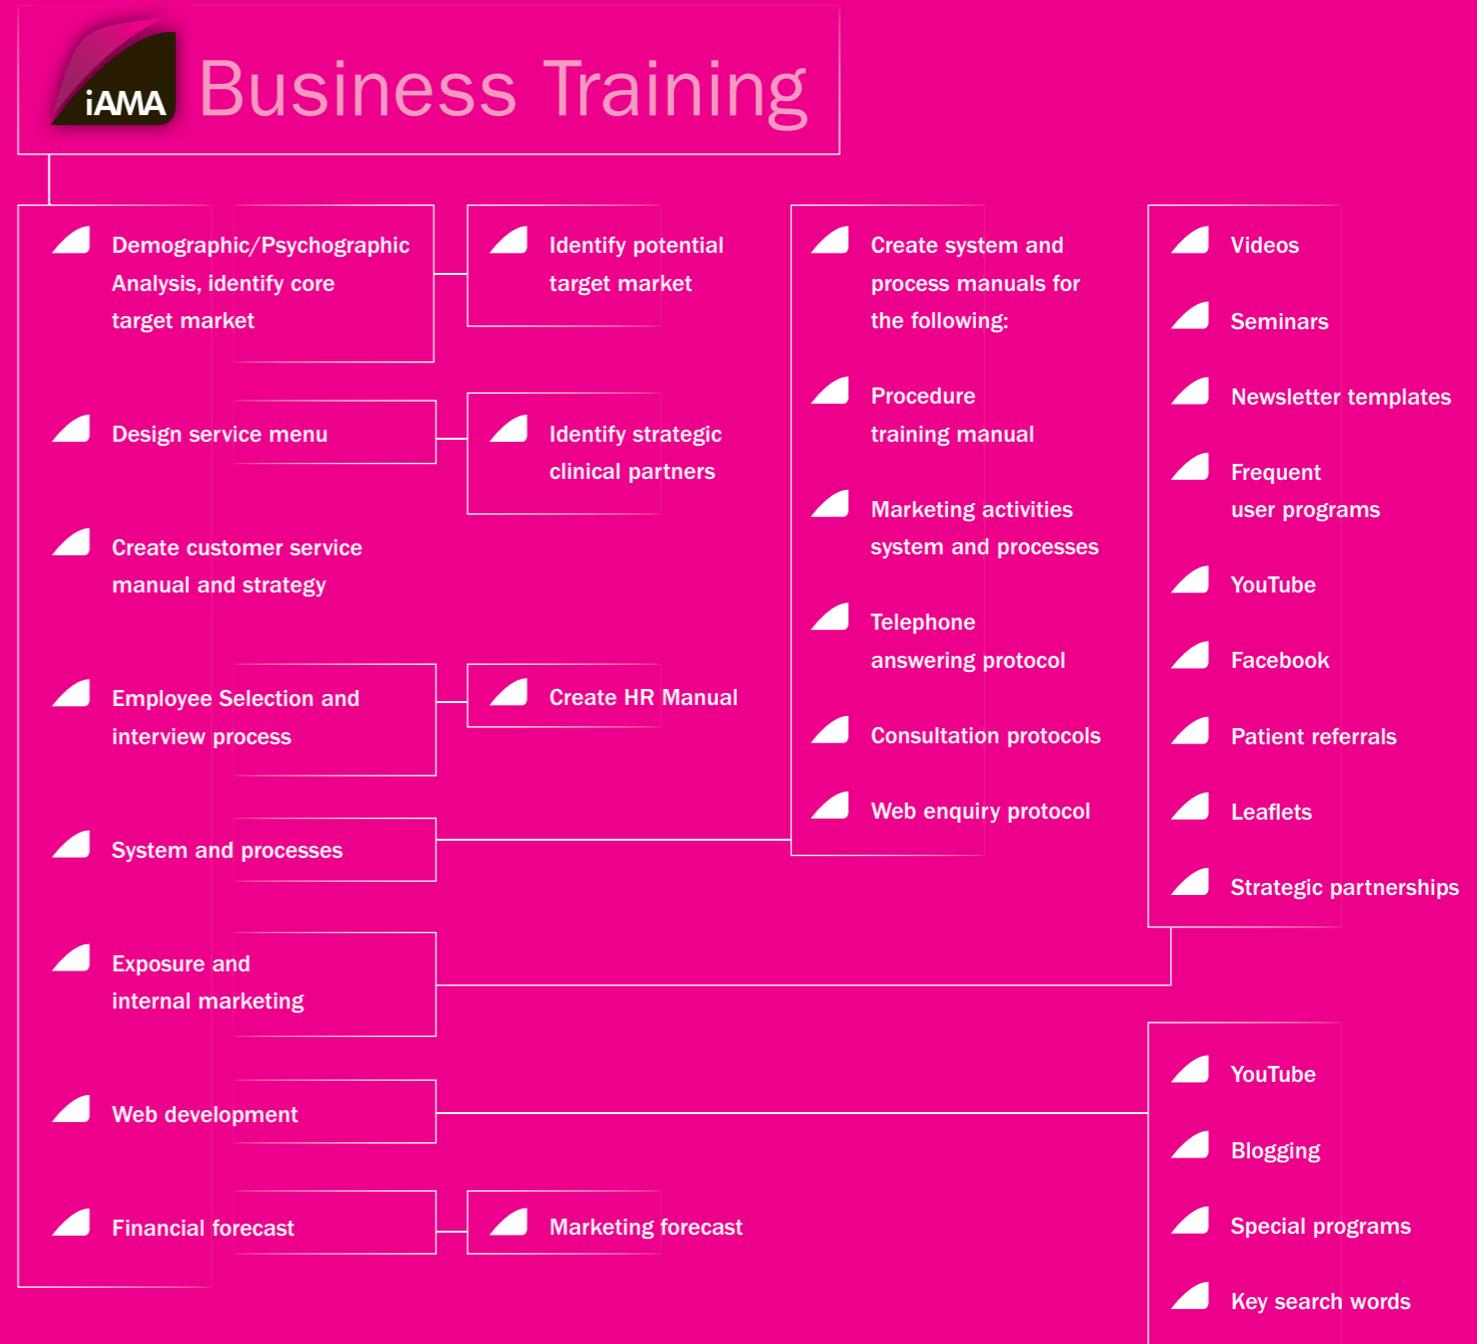

Business Development and Practice Management

What does the course involve?

The Beauty and Medical Aesthetic industry is plagued with individuals who focus on technical expertise without concentrating on how to develop and sustain a successful business. With so much competition and easy entry into this industry, business training is mandatory for a Beauty Therapist to manage their practice. Equally, if Aestheticians are to work with Surgeons, Doctors or Dentists, they will be responsible for the daily management of their division. Business acumen is essential for career growth both as an independent entrepreneur and as a successful clinic manager.

This course is unique to KT Training and was developed by Yasmin Khan. Yasmin is a Global Business Strategist and has participated in the creation of many successful Medical Aesthetic Clinics, as well as, one of the only manuals for business creation in medical aesthetics. Yasmin Khan has developed a customized business course for Beauty Therapists and Medical Professionals.

Commonly Asked Questions

What is unique about IAMA?

In short, IAMA provides the only dedicated medical development course for Beauty Therapists. KT Group of companies are unique because we not only provide premier medical aesthetic training, we also contribute to our client's business success by sharing intellectual resources gained from our business consulting division. Unlike other training organisations that are providing training services as a part time income generator, we are completely dedicated to your success. The complexity and wide array of information covered in the course will guarantee your success in the beauty and medical aesthetics industry.

Will I be able to increase my income by taking this course?

Higher education combined with practical experience is directly related to higher income. If you are motivated and prepared to learn, you will be able to market your skill sets to a wealthier group of entrepreneurs such as Doctors, Surgeons and GPs. Equally, you can work anywhere in the world with your new accreditation.

Do you provide job placements?

We will not provide job placements; however, our Consulting Division (KT Solutions) is responsible for the business development of many clients who require a Medical Aesthetician in their practice. We intend to promote our graduates to the entire medical market through the KT Group of Companies.

Will you teach Interview Skills?

Yes, interview skills will be a vital part of the Customer Service Training. We are committed to creating successful people and businesses. We will provide useful guidelines and training to help all candidates improve their external image, communication, interpersonal skills and interview skills.
